

Continuation of the successful Green Energy Finance Specialist Programme

To continue the successful Green Banking Programme training module, the Green Energy Finance Specialist (GEFS) will be offered as an open training, starting in October 2019. Registration is now possible.

The Green Banking project, conducted in the last three years in the Philippines, Indonesia, Thailand, Vietnam and India was a Capacity Building programme on Green Energy and Climate Finance. The programme was very successful and has generated high level of interest from various stakeholders in the financing and related institutions in the 5 countries. This led to RENAC, the project implementer and ADFIAP, its local partner in the region, to continue implementing the online “Green Energy Finance Specialist (GEFS)” training beyond the IKI-funded project life.

The GEFS provides comprehensive, in-depth knowledge on green energy finance topics through a combination of a 20-weeks online training (01 Oct 2019 – 22 Feb 2020) and a 3-day face-to-face seminar in Manila (Feb 2020).

The topics of this course include: Fundamentals of energy efficiency (EE) and renewable energy (RE) technologies, political and legal market frameworks, project financing and project evaluation, financial modelling and International climate finance options.

The course is accredited by the Financial Accreditation Agency (FAA) and upon successful completion of the training and passing the Finals examination, participants will receive a certificate with the title "Green Energy Finance Specialist".

Please visit [RENAC and ADFIAP websites](#) for further details. Discounts await Early Bird registrants.
